E. H. PIDGEON,
See the Buick Sedan—it is a lovely car.

Buick-Pontiac Motors. Stony Plain.

Stony Plain and District.

Mr and Mrs R B Brooks Edmonton, paid friends in Stony Plain a visit, on Saturday.

Messrs Ed Kuhl, E Sommerfield and L Javorsky returned on Friday from the West, each with a full complement of big game, and the Editor was made the recipient of a nice chunk of raw material for a Moose Mulligan.

While the Holborn mail-carrier was coming to Stony on Friday last, driving a horse and cutter, on his regular trip, the horse became frightened at a passing motor car near the Sinner farm, and headed off the grade, upsetting the cutter, contents, and driver. Aid was given by the occupants of another passing auto, and the mail taken to town; the horse, subsequently being captured a short distance away.

Saturday next sees the close of the big game season.

Sporting Notes

The Junior section of the Hockey club has organised, with Giles Clarke at its head. There will probably be two teams of this very energetic bunch of young players, and their movements will be worth watching the next few months.

The line up of the Senior hockeyists shows that Stony will have, this season, one of the best teams in its hockey history. In addition to last season's good players, there have been added some half dozen clever stick handlers, which warrants the opinion that few games will get away from the Seniors this season.

The Senior hockey team has joined up with the Edmonton Intermediate league, and the first game of the season will be played here on Saturday night, 14th, at 8.30, when a team from the U. of A will cross sticks with the local team.

The Juniors are also arranging for a visit from a City team.

Near-Accident Near the Grove

A near accident which may have proved much more serious than it was, happened near here the other day. A young man who was installing an antennae on a roof was having some trouble working, owing to his numb hands. Finally, while reaching for his pliers, he lost his hold and slid gracefully to the roof's edge. He thought he was done for, and was about to pick a soft spot to effect a landing, when lo! he felt his ear catch in the eave-trough. Fortunately for him, the trough had been put up permanent-like, and held him. After dangling for a short time, his cries attracted the attention of a young man driving a small blue truck, who rescued him from his chilly position with a pike-pole.—[Contributed]

HARDWICK'S GIFT SHOP.

CHRISTMAS SHOPPING GUIDE:
FOR THE YOUNG FOLKS—

100 Dolls 10c to \$3, Mechanical Toys, Trains, Cars, Fire Trucks, Aeroplanes, Toy Pistols, Tinker Toys, Building Sets, Tea Sets, Sewing Machines, Games, Toy Books and Girls and Boys' Books, a table of 10c, 15c & 25c Toys, Xmas Tree Ornaments, Tinsel, Xmas Stockings.

King Wheat and Wheat Kings

Canada again this year achieves the distinction of having produced the best wheat in the world by winning the grain championship at the great International Livestock Show, at Chicago, J. H. B. Smith, of Wolf Creek, Alberta, brings this honor to the Dominion, and the title of wheat king of the world to himself. This world's championship wheat trophy returns to the Dominion after having rested with a Montana man for two years. Canadians held the championship in 1921, 1922, 1923, 1924 and 1926, and the reserve championship in 1927 and 1928.

The winning of this world's championship is not a case of good luck. It is the result of years of careful planning and hard, painstaking study and work. Such an honor only accrues to those who farm in scientific manner, selecting and sowing the best seed, and from year to year learning the lessons of experience. True, they must have the background of good fertile soil, and the right kind of climate. These, fortunately, Canada has in abundance.

Canada's wheat honors are, however, a double triumph for this Dominion. It was in Canada, and through the persevering efforts of great Canadian, that Marquis wheat was given to the world, a wheat which revolutionized the production of this great cereal grain and added untold millions to the agricultural wealth of this continent. Marquis won prizes.

This year the great championship is accorded to Reward wheat, also a Canadian development, or discovery if you will, Canada's too, is leading the world in the efforts put forth to develop a new, resistant variety of wheat of the highest milling quality and possessing all the essential qualifications of an early ripening variety, just as Canada has the honor of developing the early-ripening varieties now in general use.

The bringing back of the world's wheat championship to Canada is a gratifying prelude to the great World's Grain Show and Congress to be held at Regina, Saskatchewan, in 1932. This proposed Grain Show and Congress will be the greatest event of its kind ever held, and the cash prizes to be awarded for grain will exceed anything hitherto offered at any exhibition in the history of the world. Strong committees representative of the Dominion and of each of the nine Provinces of Canada are already at work on the arrangements for this world's gathering three years hence, and it is confidently hoped and expected that between forty and fifty countries will be represented not only by exhibits, but by Government and agricultural representatives. All the world's great leaders in agriculture and the most noted research workers will participate in the Congress, with the result that the eyes of the grain growing world will be centered on Canada as never before.

Canada is already the greatest wheat exporting country in the world, not only in actual volume but also in quality of product. Every world's championship won serves to enhance that reputation, and the Dominion is placed under a lasting obligation to those farmers who, like Mr. Smith and his predecessors in winning championships, devote their time and energies to achieve such successes.

The year 1932 is not very far away. It is not too early, nor is it too late, for many more of our Canadian grain growers to lay their plans and begin work with a view to winning for themselves and for their Province and Dominion the title of World's Wheat King, 1932. Such a title awarded at the Regina Show will, in view of the much wider field of competition, be a much greater title than that awarded annually at the Chicago International.

Canada's farmers should vie with one another in friendly rivalry in an endeavor to retain for this Dominion the world's wheat championship title in each of the years preceding 1932, culminating in a supreme effort to hold the honor at Canada's first World's Grain Show in the latter year. To retain the title that now, thanks to Mr. Smith's efforts, rests with this Dominion will do much to attract still greater attention to this country in all parts of the world, and will be a powerful factor in bringing additional thousands of visitors to the Dominion in 1932 to make personal investigation and study of this great land.

"Partnership Spirit"

Railway Contribution

Railroad Operation Is a Partnership Proposition, Says Sir Henry Thornton

"We in the railroad industry have come to the point of view that successful railroad operation is a partnership proposition," declared Sir Henry Thornton, chairman and president of the Canadian National Railways, in addressing the delegates of the first annual meeting of the International Association of General Chambermen, Brotherhood of Railroad Trainmen, in Montreal. Three contributions to the art of transportation had been made by the Canadian National Railways, he said. One was the demonstration that a state-owned railroad could be operated efficiently and without political interference; the second was mechanical—the Diesel electric locomotive, "within its own peculiar limits the most effective transportation machine of which we are aware"; and the third was the development of co-operative effort between the railroad administration and the employees. "The interests of each are the interests of both," said Sir Henry. The co-operative systems on our railroad enable the administration and the employees to join hands in presenting more convincingly to the public the problems of transportation, in showing the public that it is served with vigilance, technical skill and even anxiety at every moment.

Beware Infection

Infection of cuts and bruises is best prevented by applying Minard's.

W. N. U. 1915

Film Canadian Scenes

Motion Pictures Now Available and Supplied Free of Cost By Government

Mr. Harlan I. Smith has made motion picture film during the past few years while doing other work, and from this material has been made up a collection of films of about one thousand feet titled as follows:

- (1) In Canada's Fjords (showing the Norwegian like character of the country around Bella Coola, B.C., the Norwegian colonists and their methods of earning a living by farming, fishing and logging);
- (2) The Beaulieu Indians.
- (3) The Carrier Indians.
- (4) The Tsimshian Indians.
- (5) The Coast Salish Indians.
- (6) The Kootenay Indians.

These films are subtitled and are available on application to the Acting Director of the National Museum of Canada, Ottawa, Ontario, Canada. The only expense is the expressage both ways. The films are of standard (35 mm.) width, and so may be shown in motion picture theatres. The negative of Nos. 2, 3, 4, 5 and 6 are in order so that prints may be had from any of them at cost that is with no charge for the use of the negative.

Sagacity Of Dogs

Incident Would Go To Prove That Man's Faithful Friend Has Reasoning Powers

It is pretty hard to convince people who are much with dogs that dogs don't have reasoning powers. A young Canadian trapper up in Ontario who had accidentally shot himself from harm helped find a note to his dog's collar and sent him off toward the nearest camp. The dog ran through three miles of brush, swam a river and reached the camp, which sent help immediately to his master.

"It wouldn't be much use to try to make that trapper believe that his dog doesn't think," Duluth Herald.

To Manufacture Combines

Alliance Is Formed Between Australian and Canadian Firms

As a result of an alliance between an Australian manufacturer of a combine harvester-thresher, and a Canadian manufacturer, the Australian machine is to be manufactured by a new \$2,500,000 Canadian corporation at Waterloo, Ont., according to reports sent to the Department of Commerce, by Assistant Trade Commissioner William P. Barent, at Toronto. The project will give employment to about 1,500 workers.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism, and the blood is the cause, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that the blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and pale is an impossible task because there is nothing to build up. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases; here is one:—Mr. J. W. Rose, R.R. 2, Albany, P.E.I., says:—"For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulder, at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a twinge of it since. If this meets the eye of any rheumatic sufferer my advice is try Dr. Williams' Pink Pills at once." You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preparing For Spring Work

Saskatoon Has Authorized Purchase Of 10,000 Loads Of Stone

As a preliminary for the spring work, the Saskatoon City Council have authorized the purchase of 10,000 loads of stone at a price of \$1.75 per load. Those engaged in the work must be bona fide citizens of Saskatoon and must pay for a city dray license. Stones may be gathered anywhere but along the river bank, which is the property of the Crown, even in the city limits. The stones will be piled in various locations ready for the crusher in the spring.

Persian Balm—aluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexion of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Perfect for women who care for their skin. Persian Balm is a perfect toilet requisite. Use it for hands and face.

A fruit grower near Berlin, Germany, has successfully kept birds from his orchard by connecting a loud speaker to his scarecrow.

Minard's Liniment For Coughs.

There is nothing that pays bigger dividends in comfort than that of pulling up an extra blanket during a night suddenly turned cold.

Name Stations After Hudson Bay Pioneers

Historical Designations Assigned To Places Along H. B. R. Route

Memories of adventurers who sailed into the Hudson Bay as far back as 1610, when Henry Hudson discovered this great body of water on the northern shore of Canada, are commemorated in the station names given to that section of the Hudson Bay Railroad between Mileage 412 and Churchill. Churchill now stands as the proper name of the terminus of this railway, it was announced by Canadian National Railways officials. According to the ruling of the Geographic Board of Canada this is the official name, with the dropping of either prefix "Port or Fort" by which it had been variously designated.

Commencing at Mile 417 the names of stations, with the history and the origin of these names, are as follows: Mile 417, Kellett, after Capt. Kellett, C.B., of R.E.M. "Resolute" to Lancaster Sound, Melville and Banks Islands, 1852-54.

Mile 426, O'Day, after J. E. O'Day, one of the engineers on construction from Amery to Churchill.

Mile 434, Back, after George Back, of the Royal Navy; one of the officers with Sir John Franklin's party to Hudson Bay colony in 1810-22.

Mile 442, McClintock, after Capt. F. McClintock, R.N., in Lady Franklin's yacht "Fox," brought back precise information of the fate of Sir John Franklin's ships "Erebus" and "Terror," 1857-59.

Mile 451, Belcher, after Capt. Sir Edward Belcher, C.B., of H.M.S. "Assistance" to Wellington Channel, 1828-34.

Mile 460, Cromarty, after Cromarty, a former Hudson Bay factor at Port Severn; grandfather of W. G. Cromarty, Birch Hills, Sask.

Mile 469, Chesney, after Aubert de la Chesney, a merchant and fur trader at Quebec in 1670. Who started "The Company of the North." He sent Radisson to Hudson Bay with two vessels, "The St. Anne" and "St. Pierre," in 1682.

Mile 478, Munk, after Jens Munk, who came to Churchill in 1619 in the vessel "L'Amoy." Mile 485, Blyot, after Robert Blyot, one of the crew on Hudson's ship "Discovery," in 1610.

Mile 493, Digges, after an English merchant, who along with others financed Henry Hudson's trip to Hudson Bay in the "Discovery," in 1610.

Mile 502, Tidal. The tide in Churchill River reaches a point opposite this siding. Mile 510, Churchill, Not Fort Churchill or Port Churchill, as variously designated. Ruling of Geographic Board of Canada.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passage and bring about a healthy condition. It always relieves and never causes harm. It has a permanent effect. Why not get this long-famous remedy today and commend it to your family? Inhalant or vapor it is equally effective.

A Modern Solomon

English Judge Quickly Solved Problem Of Impoverished Debtor

An impoverished debtor recently sought the protection of English law against the alleged continuous persecution of a relentless creditor. The latter, it was alleged, had publicly threatened the debtor with prison, had written communiqués which had cost him dismissal from several posts of employment, and had sent him dunning letters in the guise of formidable legal documents.

The debt was the sum of £12 9s. 6d. Shylock apparently never pursued Bassanio more relentlessly for the sixteen ounces avoirdupois of poor Antonio. The unhappy debtor, however, needed no modern Portia to plead for leniency. Judge Bradley, of the Blackpool Court, before whom the case was tried, decided it without further ado. He ordered the poor debtor to repay the importunate money lender at the rate of three pence a month, thus ending his embarrassment and granting him eighty years in which to liquidate the claim.

"Isn't dinner ready, dear?" "You'll have to wait, John, I had to send for the dressmaker to make the chicken."

Good For Toothache—Minard's Liniment.

KEEP TRAFFIC MOVING

Pompeii never had traffic problems. In the human system, as in modern cities, the great need is to keep the traffic moving. A slight obstruction may cause very serious consequences.

The road to health is to keep the human body—the intestine—is 32 feet long. Think how long it is to keep the long tube to be clogged. Think how essential it is to keep it healthy and active. You cannot afford to say "I cannot go because I have a sick headache." You cannot get indigestion or biliousness or constipation. It simply isn't done. You cannot confess that you are a victim of self poisoning from half digested food lying in the intestines, decaying and generating poisons which bedevil the eye, blotch the skin and stupefy the brain. Don't put off or delay. Try what a little friendly aid will do. FARMER'S LITTLE LIVER PILLS and Packages all druggists 5c.

Way Of The World

Public Entertainer Is Bigger Hero Than Cleverest Scientist

When Madame Curie, the 40-discov- erer with her husband of radium, left Paris to attend the celebration in the United States in honor of Edison, a great throng appeared at the depot and wild hurrahs rose from the people. On her return, another great throng awaited the depot was especially there. And there was ecstatic cheering.

But neither of these demonstrations was for Madame Curie. Few people noticed her at all. The send-off was for Maurice Chevalier, a French vaudeville star and movie actor, who was also going to New York, and the welcome was for Pola Negri and Alice Terry, movie actresses, who arrived by the same train as Madame Curie.

That is the way of the modern world. The public entertainer is the hero and heroine of the day, and no matter what any man or woman may contribute to science, to the relief of human suffering, or the progress of humanity, the public is not interested in them.

An excellent protection against worms can be got in Miller's Worm Powder. It cleanses the stomach and intestines unobtainable to them. They heal the surfaces that have been consumed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draught that the worms have made upon it, and their operation is altogether health-giving.

Is Rhodes Scholar

Manitoba University Student Chosen Of Provincial Selection Committee

J. Robert Beattie, of Winnipeg, was elected Manitoba Rhodes scholar for 1929 at a meeting of the provincial selection committee. Mr. Beattie is a student at the University of Manitoba, and he will go into residence at Oxford in the fall of 1930.

Born at Greenwood, B.C., Mr. Beattie is 19 years old, the son of John T. Beattie, of the Canadian Bank of Commerce, Winnipeg. He received his early schooling at Melfort, Sask., later attending high schools in Winnipeg, and now the University of Manitoba in 1928.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Power Plant Nears Completion The Calgary Power Company's plant at Ghost River, near Radnor, Alberta, is nearing completion and part of the plant is now in operation.

Heart and Nerves

Caused Her To Have

Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The J. Milburn Co., Limited, Toronto, Ont.

Will Retain Beef Grades On Trial For One Year, To Be Tested Out Every Month

At a meeting of the beef grading committee, held in Ottawa, it was decided that the grades already decided upon should remain on trial for a year, so that they might be tested out every month before any revision of them be considered.

It was decided after very lengthy discussion, that packers be urged to grade and brand all beef falling within the specifications of the two grades, "choice" and "good" and that every effort be made to accomplish this object, in order that both production and consumption might be stimulated by the display of large quantities of graded and branded beef in retail shops. There was a full attendance and R. S. Hamar, permanent chairman, presided.

After discussing various methods by which production and consumption could be stimulated, it was decided to ask the federal government to appoint a man to devote his whole time to further the interest of beef grading and to work up a policy for promoting the consumption of graded and branded beef, by co-operating with various bodies. These would include provincial departments of agriculture, beef grading supervisors, chain stores and railway executives.

It was deemed highly necessary to obtain the interest and co-operation of housewives and various forms of publicity were discussed. It was decided to ask the provincial department of agriculture to organize committees of producers and consumers and other bodies interested in the promotion of a beef grading program in their respective provinces. This would create a chain of workers across Canada, active and interested in the common work and ready to co-operate with the special promotion man when appointed. No definite scheme of publicity has been approved.

The decisions and conclusions reached followed a check up on how many cities were handling graded beef in greater or less quantities.

A motion of warm appreciation of the work of Ross and McKenzie in organizing the "Red Label Beef Producers and Feeders Association," in Southern Alberta was passed.

Hon. J. D. McGregor visited the meeting and was asked to speak on the work of the Canadian Beef Producers' Association.

Mr. McGregor said they had not gone very far and now there was a report that the livestock pools were undertaking similar work to that which they had planned, namely, the raising of a sum of money to advertise the beef industry. He felt there was not room for two organizations doing the same work, but he was perfectly willing to co-operate where co-operation was possible.

Those present were: W. H. McIntyre, representing the Western Stock Growers' Association; Ed. Evans, Moose Jaw, representing the Saskatchewan Stock Growers' Association; R. A. Wright, Drinkwater, Sask., representing the Western Canada Livestock Union; Walter Scott, of Ontario, representing the Eastern Canada Livestock Union; J. H. Evans, representing the four national departments of agriculture of the West; Robert Wade, representing the Eastern departments of agriculture; S. E. Todd, of Toronto, and F. M. Baker, Winnipeg, representing the Packers' Council; J. C. C. Cameron, Winnipeg, and Messrs. Cahill, Thompson and McPherson, the inspect on supervisors. Several representatives of the retail trade were also present as guests.

"There is nothing wrong with the baby, except that it is teething."
"John, send for the dentist."
Flegende Blätter, Munich.

Canada's Railway Engines

Total of 5,670 Used in Freight and Passenger Service

The 246,000 of Canada's railway cars of all sorts would not be of very much use unless there was some motive power to haul them. This brings the great pulling and powerful modern locomotives, pride of the engineers and firemen, into the story.

The Canadian railways own a total of 5,670 engines. Of these locomotives 1,488 are employed in the passenger service, 3,384 in freight haulage, 766 in switching. (Forty-two engines are run by electric power.)

For some reason that is not quite clear the number of locomotives has been steadily decreasing since 1922. In that year there were 5,955 locomotives in use.

Perhaps the explanation is found in the fact that the number of freight cars has decreased by about 8,000 since 1922. As the capacity of the smaller number of cars now and in 1922, is within a few thousand tons of each other, it means that the cars are fewer in number, but of greater capacity, and therefore requiring fewer engines to haul them.

The 5,670 locomotives in use in 1927 consumed in the year 9,840,078 tons of fuel, at a total cost of \$48,686,340, or \$4.78 per ton. Coal costs the railways less now than in 1922. Then the cost per ton was \$6.40.

The freight trains burned 5,352,474 tons and the passenger train 2,487,604 tons. It may surprise readers to know that the 756 switching engines used pro-rata far more coal than the 1,488 passenger engines—almost half as much again.

Sheep Sale At Brandon

One Of Greatest Ever Held In Western Canada

The recent annual auction sale of rams, ewes and lambs held at Brandon is described by sheep breeders as one of the greatest ever held in Western Canada, with prices at an excellent level. One of the most prominent of sheep men in Canada, George Gordon, of Oak Lake, credited the recent importation of 10,000 sheep into Manitoba by the Manitoba Livestock Credit Company with having created a demand and a market that will rank Brandon with the best in Canada. Large buyers at the sale were the Hudson's Bay Company, the T. Eaton Co., Harris Abitibi and the Swift Canadian Co.

Ship Western Horses

To New Brunswick

Animals Sent To Try Out Market For Certain Types

In order to try out the market for certain types of horses in New Brunswick, a shipment of 18 animals was recently consigned from Moose Jaw to the Maritime Province by the Saskatchewan Livestock Pool and the Department of Agriculture. Under the arrangements entered into between the Livestock Pool and the Federal and Provincial Governments, the Pool assembles the shipments and the two Governments assist in promoting the sale of the horses. Larger shipments are to be made in the near future.

Quantity and Value

When Any Article Becomes Plentiful Price Will Drop

When emeralds were first discovered in America, a Spaniard carried one to a lapidary in Italy, and asked him what it was worth; he was told a hundred escudos. He produced a second, which was larger; and that was valued at three hundred. Overjoyed at this, he took the lapidary to his lodging and showed him a chest full; but the Italian, seeing so many, damped his joy by saying, "Ah, ha, Semor! so many—these are worth one escudo."

Official rat-catchers in the city of London destroy more than 24,735 rats every year.

Next to agriculture, fisheries are the most important sources of food.

Advertising and Selling

Much To Be Learned By Canada and Britain

As for the Canadian consumer, he buys few British products because he never hears about them. He reads ten advertisements of other products to one British advertisement in Canada. The result is that he buys the goods he reads about. British goods are as a rule of high quality, but in the face of stiff competition and enterprising selling methods, they will not sell themselves. It might be said with considerable point that both Canada and Britain can take a lesson from the United States in the business of advertising and selling.—Regina Leader.

Payments For Beets

Growers In Alberta Receive Return For Year's Crop

Five hundred and fifty beet growers of Southern Alberta have received \$285,000 as a first payment for the year's crop. A second payment was made December 3. In addition to these direct returns from the beet industry there are live stock feeding activities that will bring further dividends. Thousands of cattle and sheep will be on feed this winter with rations made up largely of pulp and molasses from the sugar factory and off-grade grain and hay.

Chamber of Commerce Committee Recommends Establishment of Airports Across the Dominion

Honey Must Be Carefully Stored

If Kept Under Favorable Conditions Will Not Spoil

Much honey is wasted yearly by lack of proper precautions in caring for it after it is harvested, with the result that it soon ferments and spoils. Unripe honey quickly ferments and spoils, after it is extracted. Honey that is fully ripened, when extracted, will spoil if stored in unfavorable conditions. All honey contains the necessary elements for fermentation and, therefore, if kept in conditions favorable for the growth of the ferments, spoilage quickly occurs. The honey should be extracted, strained and canned as soon as possible after it is removed from the bees, and then stored in a cool, dry place.

Armed with spikes which contain a deadly poison a fish found in the Great Barrier Reef of Australia has the power of killing human beings. It is known as the stone fish, and is repulsive in appearance.

Airports should be established across the Dominion from coast to coast, providing for an air transportation artery, according to the aviation committee of the Canadian Chamber of Commerce which goes on to report the opinion of the committee that air transportation should be developed in co-operation with railways and steamship lines rather than in competition with these present methods of transportation. Carelessness and stunt flying should be discouraged in civil aviation, according to the opinion expressed.

The following points are stressed by the committee:

That the establishment should be effected of a main chain of airports across Canada, from coast to coast. That certain of these should be provided by the Dominion Government for its requirements and the others partly by municipalities and partly by private enterprise as may be found locally desirable. This chain would thus provide for the necessary main artery of air transportation across Canada for all forms of commercial aviation.

That the main airports be under the control of governments or municipal agencies and that airports of all kinds be under the strict supervision of Government regulations with standard equipment to secure uniformity, convenience and safety.

That at certain points encouragement and assistance should be given for establishing branch routes both north and south and for air route networks, to bring into connection the various regions which can economically be served by air.

That air transportation should be developed and operated as an adjunct to our existing rail and water transportation systems and in co-operation with them as far as possible, rather than in competition.

That every encouragement should be given to Canadian enterprise to establish and operate our commercial aviation systems, controlled by Canadians and manned by Canadian personnel, in the same manner as our other Canadian transportation systems.

That municipalities should, in as far as possible, provide their own airports and landing-fields, adequately equipped at their own expense, in order to concentrate air transportation at one place for the convenience of the public and so as to maintain it under a single local authority.

That as commercial aviation develops, government agencies should refrain from encroaching on the legitimate field of the private commercial agencies developing and conducting air transportation and in this way stimulate rather than curtail enterprise in this new field.

That the Government be assisted in every way to enforce supervision and regulations looking toward convenience and safety of air travel and that all forms of risk taking, of carelessness and "stunt flying" be discouraged in civil aviation.

That the industries connected with the business of aviation both in apparatus and operation, be in every way encouraged as Canadian enterprises, looking forward to the time when our aviation requirements will be manufactured in our own country.

That encouragement should also be given by the business men and the people of the country generally, to the formation of flying clubs on the practice of aviation (through the Aviation League and other means), so that as a country, we will acquire air dexterity and gain an advantageous position in this form of transportation.

FASHION

LOVELY CHRISTMAS GIFTS THAT WILL BRING HEARTY WELCOME

11017—A cute embroidery design of Mary Quite Contrary that will make a suitable Christmas gift for the kiddie nursery and wearing apparel. Pattern consists of various sized motifs (blue).

637—Cunning rompers having drop seat will make a practical gift for the little boy of 6 months, 1, 2, 3, 4, 5 and 6 years. The front is one piece. Belt is attached to lower back section and closes in front. The 4-year size requires 2 1/4 yards of 40-inch material with 3/4 yard of 22-inch contrasting.

11024—A dainty floral design that can be used on rompers, blouses, booties, carriage-wear, etc. It will make a splendid gift that will be highly appreciated. It is lovely worked out in busy-lazy-stitch. Pattern includes 22 designs in various sizes and motifs (blue).

11137—An attractive border design that will make an adorable Christmas gift worked out on both towels, curtains, scarves, table-covers and pillow cases. It can be carried out in white or gray colors (blue).

11015—Every woman loves to have pretty handkerchiefs, especially when they are so easily made. It can also be used as borders for collars, cuffs, and fingerings and will make an acceptable Christmas gift. Twenty-eight motifs, one handkerchief with scalloped border, one with lines for draw-works, and 50 inches each of three borders—one of scallops, one of cross-stitches and one of darning-stitch (blue).

11124—Pattern provides 2 1/4 yards of scallops 1/2 inch deep and 2 sprays.

The sprays are 18 1/2 inches wide and 3 inches deep at the widest part. Suitable for pillow cases, towel ends and dresser scarfs (blue).

11052—An attractive pillow that can be used in the living-room, made of crepe satin, velvet or flat silk crepe. Pattern provides two each of three designs, 8 inches wide by 9 inches high. It can also be used on covers, bags and other novelties.

11092—Pattern contains one of 10 1/2 by 16 inches, two of 7 1/2 by 10 inches, four of 2 by 2 1/2 inches. It may be used on dresser scarfs, runners, pillows and pin cushions. It will make a lovely Christmas gift and will be received with hearty welcome (blue).

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our new Fashion Magazine.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

TAKE GOD-LIVER OIL
The PLEASANT way

SCOTT'S EMULSION

WORLD HAPPENINGS BRIEFLY TOLD

Mrs. Edward Ellice, sister of Viscount Willingdon, Governor-General of Canada, died in London, December 3rd.

The Orient Express, Europe's crack train between Constantinople and Paris, was recently held up near Caribou, Bulgaria, by brigands, who killed two passengers and wounded several others.

The Japanese Government has declined to give its sanction to the United States Government's note to Russia or China regarding violation of the Briand-Kellogg anti-war pact in Manchuria.

It is rumored that the Labor Government intends to create more Labor peers, probably in the new year's honors list. There are now only 12 Labor peers and lords not all of whom are available for normal work in the upper chamber.

The French mint has been commissioned to strike a medal bearing the likeness of the late Georges Clemenceau. It was announced that Rodin's bust of the wartime leader will be placed in the Arc de Triomphe Museum.

An air mail service whereby a letter could be posted in Montreal one night and delivered in Winnipeg the next morning will be inaugurated some time next year, it has been announced by Hon. Peter Vennet, postmaster-general of Canada.

The London Daily Mail says that the accuracy of the report of Commander Richard Byrd, of his South Polar flight, has been challenged by Major Trygve Gran, Norwegian airman and explorer, who was a member of the Scott Antarctic expedition.

Announcement was made by Hiram Walker, Gooderham, Worts Co., that a \$300,000 carbonic acid gas plant is to be installed in their plant at Toronto and that such units will later be installed at Montreal and other points. It is planned to manufacture what is known as "dry ice."

Nation-Wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Canada's Accredited Herds

Over Four Thousand Given Clean Bill Of Health

Upward of four thousand herds of cattle in Canada have been given full accreditation by the Department of Agriculture, at Ottawa, according to the report of the Veterinary Director-General for the past fiscal year, published by the Department of Agriculture, at Ottawa. That is to say, this number of herds have been dealt with by tests and retests and restricted measures which have given them a clean bill of health with respect to the disease of tuberculosis.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Extirminator.

Commentation

Salemen (showing customer some sports stockings): "Just the thing for you. Worth double the money. Latest pattern, fast colors, holeproof, won't shrink, and it's a good yarn."

Customer (politely): "Very well told, too."

Will Represent Canada

Boys' and Girls' Swine Club Winners Banqueted by Canadian National Railways

Declaring that there was every reason to believe that they would bring back with them the world's championship in cattle judging from Great Britain next year, Hon. Dr. Motherwell, Federal Minister of Agriculture, gave words of sound advice, encouragement and congratulations to the three young farm lads who are to represent Canada in the 1930 International Judging Contest, at a dinner given in their honor at the King Edward Hotel at Toronto.

The three boys, Cedrick Kirkpatrick, Gordon Campbell, and Clifford Baldwin, from New Brunswick, Nova Scotia, and Ontario, respectively, were the central figures at the banquet given in honor of the Boys' and Girls' Live Stock Club contestants by W. D. Robb, Vice-President of the Canadian National Railways, under whose auspices the contestants visited Toronto. It is under the joint auspices of Dr. Motherwell's Department and the Canadian National Railways that the three boys will have the trip to Britain for the world contest next summer.

Both Vice-President Robb and Dr. Motherwell took occasion to congratulate the three boys who are the first to win the honor for Canada. The theme of Dr. Motherwell's address to them was "Service to others" in their future lives. There was no question, he said, that the boys, as well as all the winners in the boys' and girls' contests, would become leaders in their communities and there rested a great responsibility upon them in seeing that they carried on to others in coming years what had been handed down to them from the Federal, Provincial and Railway authorities. The Federal ministers said that this work was most valuable, and praised particularly what the Railway Company had been able to do for the young farmers.

Mr. Robb, in his annual address to the club members, said, that the winners being honored represented nearly six thousand farm club members in Canada, and the movement was growing. It had been invaluable in raising the status of the Livestock Industry in the Dominion, and the Railway was only too glad to be of service in this regard. Dr. Black, Director of Colonization and Agriculture, for the Canadian National Railways, told of the policy of his department to co-operate with the Federal and Provincial authorities in all movements for the improvement of agriculture. Nearly one hundred agricultural officials from all over the Dominion were present at the dinner to honor the young farmers who had won the championships.

Illusion Destroying Facts

Despite Peace Talk, Nations Are Continuing To Maintain Armaments

Says the Manchester Guardian: Fifty-five per cent. of the British budget goes to pay for past wars, and 15 per cent. to prepare against future wars—that is to say, war costs us 14s. in the pound. In France the proportions are almost exactly the same. Our present real expenditure on armaments is just as high as the average during the years 1909-1914. The same is true of France. Italy spends considerably more than she did in those years. Russia has been augmenting her expenditure on armaments steadily during the last few years, and is, in spite of her poverty and her reduced size, approaching the pre-war level. The United States has all records—her expenditure on armaments has nearly doubled. Even Germany's performance is considerable—she is supposed to be "disarmed," and yet she now manages to spend a third of what she spent upon her colossal army and fleet before the war. The "economist" has done a public service in tabulating these illusion-destroying facts.

New Dish For Her

Now that the season has arrived for the consumption of Belgian rabbits distinguished as juggled hare, the story is related of the dead old lady who was seated at dinner beside a polite gentleman who did his best to make conversation. "Are you fond of bobbed hair?" he asked. "I can't say," she answered. "I never tasted it."

Russian peasants often sleep with their cattle.

ASTHMA

QUICK RELIEF obtained by thousands through use of Dr. J. H. Guild's Green Mountain Asthma Compound. Its potent mixture of 2000s and 1000s. Originated in 1889 by Dr. J. H. Guild, Canada. Also relieves catarrh, standard remedy at drug stores. 25 cents per bottle and 50c per bottle of 4 oz. glass. Cough, Croup, Whooping Cough, Asthma, Hay Fever, Eczema, etc. Dr. J. H. Guild, 286 St. Paul St., West Montreal, Canada.

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

Exceeds Human Skill

Robot Reduces Risks Of Flying and Air Force Interested In Device

An infallible Robot airman, capable of controlling airplanes of all sizes in all kinds of weather with more dependability than the human pilot, has been produced by the scientists of the Royal Aircraft Establishment, the air correspondent of the London Daily News says.

The Robot pilot consists of a compressed air-driven gyroscope which controls pistons, rudder and elevators of any type of machine from the smallest single-seater to the large twin-engined bombers and flying boats. The gyroscope weighs 100 pounds and has been demonstrated successfully over distances of 400 miles, bowing to the human pilot only when 'places must ascend or descend. The Robot is claimed to be infallible and to minimize greatly the risks of flying. The Daily News correspondent said it was understood the Royal Air Force was contemplating adopting the device for use in future long distance flights and that commercial air lines were negotiating for the device for the purpose of installing it in passenger and mail 'planes.

Air Mail Across Canada

Stated That Service Will Be Inaugurated Some Time Next Year

An air mail service whereby a letter could be posted in Montreal one night and delivered in Winnipeg the next morning, will be inaugurated some time next year, it was announced by Hon. Peter Vennet, postmaster-general of Canada.

Mr. Vennet pointed out that this route to Winnipeg, which would be via Toronto, was only a segment of the Montreal-Vancouver line, which he hoped would be established and would accomplish a saving of 40 hours over the fastest present delivery.

More Using Electricity

Electrical energy consumed during the first nine months of the year by users of the City Hydro in Winnipeg, amounted to 262,000,000 kilowatt hours, an increase of 15 per cent. over the same period of last year.

SUNDAY SCHOOL LESSON

DECEMBER 15

THE CHRISTIAN SPIRIT IN INDUSTRY

Golden Text: "As ye would that men should do to you, do ye also to them likewise."—Luke 6:31.

Lesson: Exodus 1:8-14; 20:17; Deuteronomy 24:14, 15; Amos 4:6-10; Zechariah 8:16, 17; Matthew 20:1-16; Mark 12:1-9; Luke 3:14; Ephesians 6:5-9; 1 Timothy 6:17-19.

Devotional Reading: Matthew 7:1-5.

Explanations and Comments

Laws Regarding the Treatment of a Servant, Deuteronomy 24:14, 15.—The law in regard to the hired servant was that, whether an Israelite or of another race sojourning in their land, he must not be oppressed. He must be given his wages at the end of the day, for being poor, he was in need thereof; otherwise, would he make known to Jehovah the failure of it would be accounted a sin unto the master.

The Obligation of Servants and Masters, Ephesians 6:5-9.—In the time of Paul all servants were slaves, and here in his letter to the Ephesians he bids servants be obedient to their masters, with fear and trembling, that is, with anxious desire to please them, and with undivided allegiance, as unto Christ. Recall our text of last week, when Christ speaks of deeds done in secret as done to Him. They should not give eye service, merely work that would "get by" with their masters, but as slaves of Christ, do the will of God heartily; performing their tasks cheerfully as unto God, not unto men; knowing that the good work of every one, whether a slave or a free man, shall receive its reward from the Lord.

The masters likewise have their obligations; they also must show forbearance, as unto the Lord, and must avoid threats; knowing that the common Master of all is in heaven, and in judging them will respect of persons, no regard for differences of earthly positions. "Paul does not tell them to manaculate their slaves; but he tells them to love them as brethren (Philemon 16). This does not free the slave, but it frees slavery of its evils."—Dummelow.

The Obligations of the Rich, Timothy 6:17-19.—Paul tells Timothy to charge the wealthy not to be conceited (high-minded), not to set their hope upon riches which are uncertain, but upon God to whom they owe their good things. God gives richly all things to enjoy. Christ came that we might have life, and that we might have it more abundantly. The rich should go on with their wealth, become rich in good works, ready to share, willing to communicate, and so lay up for themselves treasure in heaven.

BUCKLEY'S

Has Liked It Back & Forward Sixty Years

Twelve Years Of the Millennium

Condition Of People Of Russia After Twelve Years Of Bolshevik Rule

The Soviet government celebrated the twelfth anniversary of the Russian revolution, according to Moscow despatches, by giving "bread and meat at cost price to every member of the population holding bread cards."

After twelve years of Bolshevism, the right to buy a square meal at cost price for one day only is the greatest boon the Soviet government can confer upon the workers whom it dominates.

Among great masses of the population, apparently, meat as a complement of their daily bread is a luxury to be enjoyed only at such times as annual national holidays, and then sparingly and on a card-regulated allotment basis.

What a commentary on the inefficiency of communism! The political system that was going to make man free has only made men hungry paupers, waiting in line with their bread cards for the doles of meat that mark such special occasions as the birthday of their pseudo-freedom.—Minneapolis Journal.

Really An "Air" Plane

A Russian aeronautical expert, Prof. Rindine, has a pet theory which claims that aeroplanes flying 30 or more miles high in the air need no fuel. He claims that an increased supply of hydrogen at that altitude could be exploded in a special engine and furnish power to propel the plane, thus running the plane on air.

When you see six women going into a bathroom together it means that one of them is going to get a hair-cut.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic, WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that it has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabling for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, all buildings, etc. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, restaurants, hot plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 120 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

WANT ACTION ON UNEMPLOYMENT SITUATION HERE

Ottawa.—A letter to Premier MacKenzie King urging that he call a conference of financial, industrial and labor leaders throughout Canada, has been sent by A. R. Mosher, president of the All-Canadian Congress of Labor, and the Canadian Brotherhood of Railway Employees. In a statement issued recently, Mr. Mosher referred to a conference held in Winnipeg between representatives of provincial and municipal governments and organized labor for the purpose of dealing with the unemployment situation. Mr. Mosher stated that in his letter to Premier King, he called attention to the fact that, from the time it was ascertained that the wheat crop would be a partial failure, the railways had made immense reductions in staff, and their example was being followed by other industries which were similarly affected with the result that buying power had been considerably diminished. A widespread business depression was threatened.

Seasonal unemployment had appeared at an unusually early period, and the stock market collapse had, in his opinion, acted as a most perfect fully as great in proportion to population in Canada as in the United States.

It was of the utmost importance, Mr. Mosher's letter stated, that public confidence should be restored by a survey of business conditions, and that plans be drawn up for the provision of employment; and the fear that it would spread to great proportions had curtailed public expenditure, creating a vicious circle which might work extreme havoc in Canadian industry.

The Winnipeg conference brought out the fact, Mr. Mosher contended, that unemployment in the west was greater than at any period in the previous five years, and regretted the attitude of the federal government, which apparently had municipal authorities to deal with. Mr. Mosher took the ground that in a time of crisis, technicalities of jurisdiction should not prevent the rallying of the constructive forces of the country, and that the Federal Government alone could give the leadership which the situation demands.

Hunter Found By Indians

Was in Starving Condition After Wandering For Five Days

Meadow Lake, Sask.—Lost in the woods and without food for five days, C. L. Galbraith, druggist, of Edam, Sask., has been found by Indian trappers who combed the heavily treed country near where Galbraith had been hunting. He was exhausted and in a starving condition.

Galbraith, who is about 32 years of age, went shooting with Arthur Rister and George Paradis, also of Edam. He left camp at dawn to look for moose and failed to show up at dark. He had taken only a small lunch as a noon meal.

His companions, failing to find Galbraith themselves, sent word to MacEwan, near here, that the druggist was missing and search parties consisting chiefly of Indian trappers, were organized.

Lord Byng Recovering

London, England.—A bulletin issued at Lord Byng's home, stated, although he is much debilitated by his recent illness, his doctors are satisfied with his progress and hope he will be able to sail for South Africa on December 20. His physicians anticipate he will ultimately recover completely from the congestion of his lungs.

Receives German General

London, England.—The Prince of Wales received General Von Lettow Vorbeck, commander of German forces in East Africa during the Great War. General Von Lettow came to London especially to dine with General Smuts, the British commander, at a dinner given the East African veterans on December 2.

England's first girl traffic officer, who has started her duties on the Portsmouth road, is 23 years old.

W. N. U. 1815

Six Perish In Fire

Father and Five Children Unable To Escape From Burning Home

Alfred, Ont.—Paul Baptiste Sauve, and five of his children, ranging in age from 2 to 10 years, were burned to death when fire swept their farm home here, Mrs. Sauve, with her infant daughter and oldest son, Paul, aged 12, escaped by jumping from the second storey as the flames roared through the frame house.

Unable to save her husband and the other children, whose escape had been cut off, the frantic mother threw her one-month-old baby out of the window on to the pillow snow outside and then jumped for her own life. Both her legs were broken in the leap and these painful injuries, along with the resultant shock may result in her death, it is feared.

With Paul carrying the baby, she had crawled over the snow-covered ground in her night attire to a barn nearby, where she was later found in a state verging on collapse by neighbors.

When the neighbors arrived the house was a veritable furnace and it was an impossibility for anyone to attempt an entrance.

Work Ceases For Winter

Handful Of Men Will Stay At Churchill Until Spring

Winnipeg.—Where hundreds of men have toiled during the summer months, planning and building at Canada's newest ocean port, Churchill, 1,000 miles north of Winnipeg, all is now silent.

The "King of Churchill"—George Kidd, resident engineer of the department of railways—his retinue and builders, have departed, and only a few hardy pioneers remain to face what is hoped will be the last winter of "isolation" for the port of Churchill.

The "Muskeg Special," the famous north country passenger train of the Hudson Bay Railway, which has Churchill for its terminus, left the port for The Pas, December 2, on its last journey of the season.

From now on—except for the arrival of an occasional mail by dog team from Mile 327—Churchill is shut off from civilization until the builders return in the spring. Next year it is hoped, all winter service will be maintained on the Hudson Bay line.

May Request Salary Increase

Government Likely To Be Approached By Civil Servants

Ottawa.—Indication that the Dominion Government will soon be requested to grant all classes of civil servants a flat salary increase of \$180 is contained in the annual message of President Vernon L. Lawton of the Ottawa Civil Service Association as published in that current issue of the Civil Service News.

The request which the association is expected to make would entail the balance of the \$500 increase sought in 1927. At that time a flat salary boost of \$120 was sanctioned by the government.

Movie Of Premier's Visit

Ramsey MacDonald Shows Cabinet How He Was Received In Canada

London, England.—Premier Ramsey MacDonald, at a private film party, let his cabinet, several diplomats and 150 friends see himself as he appeared in Canada and the United States during his recent visit.

News reel extracts of his tour with talking accompaniments gave the prime minister's colleagues an idea of the warm welcome he received. Cabinet members derived considerable entertainment during the showing when it was demonstrated how movie operators had to tell the government leaders how to stand, where to walk, when to talk and sometimes what to say.

Valuable Foxes Stolen

Fredericton, N.B.—A theory that an organized body of fox thieves is operating in the province and also in Prince Edward Island, appeared to be borne out when James Dunlop, caretaker of the Roland J. Murray Fox Ranch, on the old Springfield road, discovered that a large number of valuable foxes had been stolen from the ranch during the night, the animals being killed on the premises and the carcasses taken away by automobile.

RECEIVES RECOGNITION

John J. Page, recently appointed manager of the Western Canada Flour Mills, who has been honored by the president of the Czechoslovakian Republic with the Order of the White Lion officer class, "for civic merits."

Predicts Higher Price For Wheat

Indicated By Figures Given As To World Supply

Toronto.—In a special dispatch from Winnipeg, the Mail and Empire reports George McIvor, general sales manager of the Canadian Wheat Pool, as disclosing a difference of 62,000,000 bushels between the world's export surplus of wheat and the import requirements. The available surplus for export is estimated at 708,000,000 bushels and the import requirements at 770,000,000. The dispatch says:

"The difference must be made up out of the normal carry-over; representing the wheat usually held over after domestic requirements have been met. The exhaustion of present world surplus outside of Canada would still leave a balance for export from Canada of 286,000,000 bushels whereas only 224,000,000 bushels are available in Canada for export, according to the figures."

The inference is that if the figures are even reasonably correct Canadian wheat is due for a pronounced bull market before the end of the year.

Foresees Peace Conference

Sir George Foster Believes Religious Leaders 'Will Meet In 1931

Ottawa, Ont.—The holding in 1931 of a conference of religious leaders embracing every major faith for the purpose of formulating a plan for the maintenance of world peace, is foreseen by Sir George Foster. Philanthropic organizations are also becoming organized throughout the world with this idea in view, he said, in addressing the Ottawa Women's Canadian Club.

Sir George did not enlarge on the reasons for his prophetic utterance. If held, such a conference would most certainly influence a multitude of people, he said.

Fighting To Keep Soo Channel Open

So Grain Vessels May Be Able To Reach Ports

Sault Ste. Marie, Ont.—A fight to keep the channel below Sault Ste. Marie open is being made by four tugboats of the Thompson Towing and Wrecking Company of the Michigan Sault, so that some 45 freighters still in the upper chamber of the lake, downbound with last cargoes of grain, can reach their ports before the icy hand of winter closes the neck of the bottle which from year to year is a menace to mariners both up and down bound.

The fight has been a strenuous one so far, and at the end of the recent big storm it was feared the ice king had won. Twelve below zero weather, a record for 42 years, formed ice ten inches thick below the Sault and the drifting ice and slush packed up the rock cuts and narrow channels until it was 10 to 15 feet deep in places. But the tugs got through and released some 30 freighters. The safety gap is slowly but surely narrowing, due to freeing western traffic through the canal is now all downbound, the vessels which have already gone down within the past few days with grain being storage carriers and will not return for another cargo.

Note Surprises U.S.

Russian Reply To United States Over China Situation Causes Amusement

Washington, D.C.—Awaiting receipt of the Russian memorandum in reply to United States proposals to prevent warfare between the Soviet Union and China, forwarded through French diplomatic channels, government officials studied the text of the communication transmitted by press correspondents and informally expressed complete surprise and amazement at the severity of its tone and the harshness with which it criticized the action of the United States in calling attention to commitments under the Briand-Kellogg treaty for the renunciation of war.

President Hoover and Secretary Stimson were informed of the Russian response of the peace proposals, but together with other high officials of the administration declined to comment.

Subordinate officers of the Senate department, however, were not hesitant about speaking their opinion of the new turn in the Sino-Russian situation.

Canadian Muskrafs For Russia

Montreal.—A shipment of 10,000 pairs of muskrats from Canada to Russia by Canadian Pacific express and steamship sets a new record in the history of the fur trade. The muskrats will go forward in January and are being shipped by the Ingoldside Fur Farms, Ltd., of Linden, Ont., to the Russian Government by way of Danzig, and are valued at \$250,000.

LORDS VOTE AGAINST SOVIET AGREEMENT

London, England.—Lord Birkenhead had the personal satisfaction of defeating the Laborite government 43 to 21 in the House of Lords, on a motion that he introduced "That diplomatic recognition of the Soviet Government is not desirable."

Neither the debate nor the vote, however, is expected to have any effect on the government's announced plan of resuming full relations with Russia.

Lord Birkenhead called attention to the alleged Soviet revolutionary propaganda including "a hideous attempt to provoke a native insurrection in South Africa."

After Lord Birkenhead had supported his argument by citing the American policy, Lord Farnborough declared that while it was true the United States did not have diplomatic relations with Russia, there was a very important American mission in Moscow and Russian mission in Washington.

Lord Thomson, air secretary, replying for the government, said the government policy could be stated simply and definitely as follows: "It is to resume normal diplomatic relations with the least possible delay and at the same time to safeguard British interests throughout the world. The reasons for the step are in the first place to do everything possible towards the maintenance of world peace, and secondly, because the government wanted to expand British trade."

Will Purchase Legation

American Legation Building To Be Provided At Ottawa

Washington.—Congress has authorized purchase or construction of an American Legation building in Ottawa as part of the program to place all American diplomats serving abroad in government-owned buildings.

Chairman Stephen G. Porter, of the House Foreign Affairs Committee, has visited Ottawa in connection with this project and selected for purchase by the United States, a home and surrounding estate which probably will not be for sale for several years but eventually will come on the market.

William Phillips, who recently resigned as American minister to Canada, frequently complained to friends against housing conditions to which he and his family were subjected in the Canadian capital. Lack of what he considered a suitable home contributed to his resignation, his friends said here.

Makes New Record

Saskatchewan-Owned Cow May Top All Yields This Year

Toronto.—By her production of more than 15 tons of milk in a year, Canary Kornkyde Alcarata, a Saskatchewan-owned Holstein cow, has established a record that bids fair to top all yields in Canada for 1929.

According to figures given out by the Holstein-Friesian Association of Canada, this cow produced in the 365-day division of the record performance 99,801 pounds of milk and 1,336-25 pounds of butter, with an average of 3.47 per cent. fat.

This cow was bred by Ferd V. Keeney, Ingersoll, Ont., and sold as a yearling to B. G. Sims, Winnipeg, who in turn transferred her to B. H. Thomson, Moose Jaw, under whose supervision and management all the above records have been made. Last year, however, after finishing her world's record, she was purchased by the Saskatchewan Government for \$10,000.

Re-Open Empress Hotel

Winnipeg.—The official opening of the enlarged Empress Hotel, at Victoria, B.C., to which a huge addition has recently been completed at a cost of approximately \$3,000,000, will be held on Saturday, December 21, it is announced by H. F. Mathews, general manager of western Canadian Pacific hotels. The opening, with its attendant social functions, will be forwarded on Sunday by the next train of the Yuletide Festival being held this Christmas at the Empress.

Which is the leech and which is the luff of a sail? Where does the tack of a standing lug make fast? What is the loom of an oar? These and a hundred other questions that are baffling conundrums to the layman are child's play to the seven bonny stewards of the Canadian Pacific liner "Duchess of York," who recently obtained the British Board of Trade Certificate for Lifboat Efficiency. They are left to right: Mrs. G. Riley, Miss J. Johnson, Mrs. A. Caldwell, Miss C. Pendleton, Mrs. A. Silk, Miss A. Rowan, and Mrs. G. Lavender. The examination for the Board of Trade Certificate is the most exacting test of its kind, and requires an intensive practical knowledge of regulations regarding boat and fire drill, fire-prevention, rocket, apparatus, breeches-buoy, and artificial respiration from drowning and smoke asphyxiation.

Know Canada Contest

The Family Herald and Weekly Star, so well known as Canada's outstanding farm and home paper, is launching another of their Know Canada Contests, in which \$3000.00 are being given as prizes. The First Prize is \$1000.00.

Each week four pictures are published and readers are asked to decipher the Canadian pasted-figures they represent. It is a most interesting pastime, combining a great deal of real amusement and entertainment with an opportunity of carrying off a very nice sum of money in prizes.

It is a contest that will interest every one of our readers and details of it can be had for the asking. A letter to the Family Herald and Weekly Star, Montreal, will bring you all the particulars and a sample copy of the paper too and of course it does not obligate you in any way.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he doesn't know it. He marries Molly Winton, a ballad singer, but after he wins fame as a composer of popular songs, Molly suddenly appears with John Perry, Al's best friend. The couple take Al's two-year-old baby, Junior, and sail for France. Al, completely broken by his loss, disappears from Broadway and becomes a derelict. Months later he appears at Blackie Joe's club, where Grace Farrell tries to shame him into staging a comeback by telling him she will tell his boy later how he drifted downward. In a rage, Al threatens to kill her.

CHAPTER XXV

Now Al was in front of Grace; his thin hands reached toward her throat, but she did not flinch or make a sound. She felt the lean fingers go round her white throat, while the haunting, terrible eyes rove on a level with her own, then above her. The fingers tightened—he was pulling her closer to him. She half closed her eyes—well, if he wanted to kill her, let it come. She loved him still—she knew it at this fateful moment.

But as Al felt her graceful young body against his own the instinct of the killer subsided. She was young and beautiful—suddenly the reason for her harsh attitude became apparent to even his disordered mind. She was doing it to help him. The tension in him snapped, his hands loosened about her throat, and his head was buried against her breast. As she felt him, Grace's arms went round him, holding him close. Her radiant face was lifted in a prayer of thanks.

She could only think of one thing, she loved him, she was going to pull him back to courage and life! Finally his head came up.

"I'll do my best, Grace! I'll make good—I'll show my kid his daddy isn't a flop!"

At that moment Blackie appeared at the door, took one look, and tipped away.

Al stared at Grace. "I can do it if you'll stand by," he suggested.

Grace nodded. "You can count on me Al," she whispered tenderly.

As Al spoke Grace realized the full significance that lay behind his words. He was saying that his comeback depended on her, but he was also suggesting something more—that he wanted her in his life. Did that mean that he loved her—at last?

Her lips trembled and she reached up to stroke his hair. His hair hadn't changed, at any rate. It was

the same thick, lustrous black it had always been. She was confused and embarrassed, and she felt tears filling her eyes in spite of her efforts to fight them down. Then Al's face became misty before her.

"Everything will be all right, Al," she whispered. "You've got the stuff—we both know that."

She was really talking to fight her way back to self-control. She realized now the fearful price she had paid in desperately striving to put Al out of her thoughts during these past three years. The effort had taken terrible toll from her emotional nature; no wonder the knowledge that Al needed her and asked her to stay close to him produced a shattering reaction.

Some vague feeling of this reached the young song writer, but he couldn't be sure of the cause. He saw Grace's beautiful eyes dimmed by tears, but for all he knew this display of intense emotion on her part might come from a merely maternal feeling or from the generous spirit that made Grace feel kindly toward almost everybody. He had never known that she loved him.

"Grace," he said, "I did write a song several months ago, but I thought it wasn't any good, so I put it away. But I know how it goes. Would you like to hear it?"

"Of course I would, Al," Grace answered quickly, glad of an escape from her own highly charged feelings.

"Sit down at the piano—try it."

Al moved hesitatingly toward the piano. "I'm not sure I can even play—it my fingers are like bread sticks. But I'll try."

He pulled the stool up to the keyboard and ran up and down the scales in preparation. Already, it seemed to him, his fingers were more supple and stronger. But of course he now had a reason for playing.

It's called 'Among My Souvenirs' and it starts like this:

The song began, Al's voice matching the pathos of the words. Grace leaned against the piano, chin in hand, a rapt expression on her face. Now the mist of tears had passed. She was able to see Al clearly and she made no attempt to hide her joy in his presence.

His voice came waveringly at first, then, stronger, Grace made a mental note that golden voice that had emotional scale so easily from humor to tragic sentiment was just as flexible as ever. If anything, its emotional quality had been deepened by his tragic experiences.

Grace was thrilled, first by the song, then by the gaze of affection that Al fixed on her. The listless look had passed from his eyes, he had forgotten his stiff, sore fingers. He had lost himself in the song and in the vision of Grace before him, so that the change of his face made him a different man from the derelict who had staggered into Blackie's place an hour ago. In that, flashing moment he almost became the old Al.

The last note of the song ended, and suddenly Al slumped down on his piano stool, burying his head in his crooked arm on the keyboard. The strain of singing and playing was too much for him.

Grace came around the piano rapidly, putting her arms about him, whispering in his ear:

"There, there; I know it's hard at first. But the song is beautiful. It will be a success—I know it! And it's only your start."

"Do you think so, Grace?" Al raised his head. "Do you really think so?"

"I'm sure of it."

"Then Grace turned. Blackie was in the doorway again.

"Did you hear it?" she whispered.

"Yep," Blackie nodded. "It's a wow. One of his best."

Blackie was fairly beaming. When Al wasn't looking, he beckoned to Grace to slip away for a moment. Then he went back to the main room and waited for her.

"I can see you've pulled him out of it," whispered Blackie, "but how on earth did you do it?"

Briefly Grace explained. Blackie patted her smart kid on the shoulder.

"You're a smart kid, Grace, and I hope Al appreciates you. You've made a good start, but you know it will be awfully easy for him to slip back again. Make him find himself a decent place to live and make him buy himself some decent clothes. That helps a lot."

"Sh-h!" Grace put her finger to her mouth, afraid Al would hear. "I won't let him slip back—you leave him to me."

Blackie chuckled as Grace hurried

back into the room with Al; already she was assuming a possessive manner toward the man she loved. Well, thought Blackie, he couldn't be in better hands!

It was morning—again the customers had all left, the chairs were piled on the tables and the scrub women were busy cleaning up. Again the windows of the main room were thrown open, allowing the stale smoke from cigars and cigarettes to drift outside in silver spirals.

"Al, you should be going home to get some sleep," said Grace gently. "May I walk along with you?"

"Of course, Grace. Let's go."

As they started for the main room Grace glanced down the dressing room corridor. She recalled that morning more than three years ago when she had overheard Al and Molly singing rhapsody. Then she had run away to hide her tears. How similar this morning was, yet how different. Now she was walking home with Al, and he had begged her to "stand by."

Down the narrow stairs they went, but when they reached the street Al swayed for a moment. Grace took his arm.

(To Be Continued.)

IS THERE A BABY IN YOUR HOME

Is there a baby or young children in your home? If the answer is yes, you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and mean pain always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; break up colds and croup; relieve all the minor ills of little ones. Concerning them Mrs. Moise Gabotte, a Canadian, writes: "My baby suffered terribly from indigestion and vomiting, but the Tablets soon cured him and now he is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from Dr. Williams' Medicine Co., Brockville, Ont.

New System of Radio Sending

Transmission of Entire Newspaper Page May Be Possible

A new system of radio communication by which it is claimed congestion of ether will be completely solved and by which cheap, high speed transmission of photographs of entire pages of a newspaper may be possible, was described at a dinner of the British Radiolast Corporation in London.

The inventor of the new system is Dr. James Robinson, formerly chief of wireless research of the British Royal Air Force. Robinson's device, known as the Stepode Radiolast System, it was claimed, will permit radio telephone to be received on a frequency band of 10 cycles or less compared to the present day practice which involves a frequency band of more than 9,000 cycles.

The device, speakers said, will not make it necessary to scrap existing sets but instead will increase greatly their utility by giving great impetus to the radio industry.

Dance Floor By the Yard

A portable dance floor has been introduced in London, England, which will offer a perfect dance floor to anyone desiring to move from place to place. It is made up of strips of wood firmly attached to a strong canvas backing. It can be rolled up like a carpet and costs about as much per yard as a good rug.

Only three towns with a population of more than 300 are to be seen along the 500 mile stretch of the Alaska railway.

Minard's Liniment for Discomfort.

Byrd-Making History

First Man To Fly Over North and South Poles

The New York Times, the St. Louis Post-Dispatch and newspapers affiliated with them, in publishing reports from Commander Richard E. Byrd's expedition, announce that Commander Byrd had safely returned to his base, Little America, after a successful flight across the South Pole, in which he surveyed much adjacent territory.

Commander Byrd's flight across the South Pole has made him the first man in history to fly across both the earth's poles.

In May, 1926, in the tri-motored aeroplane, the "Josephine Ford," Commander Byrd flew from King's Bay, Spitzbergen, across the North Pole and returned.

That springtime flight required a total of 16 hours and 30 minutes and the round trip covered 1,600 miles. In addition to being the first to fly across the North Pole, Byrd was also the first man to fly over it in a heavier than air machine. On that historic flight, his pilot was Floyd Bennett, who died April 25, 1928, while attempting to rescue the crew of the trans-Atlantic plane "Bremen" on Greenland Island. Bennett was second in command of the Byrd Antarctic expedition and had intended to accompany the commander on the trip.

The flight across the South Pole, was the first attempt he had made to fly to the pole, although previously he had used aeroplanes in flights from his base at Little America is laying sub-bases on the route to the pole and in exploration trips.

He was the third man to reach the South Pole. The first was Roald Amundsen, a Norwegian, who reached it December 14, 1911. A few days later he was followed by Captain Robert F. Scott, British explorer. Both of them used overland methods of travel.

Minard's Liniment for Chapped hands.

Has Become Popular

Rayon Is Manufactured in Nearly Every Country in World

Rayon was a product little heard of ten years ago. Today this substitute for silk is manufactured in nearly every country on the globe. The largest rayon holding company in the world has just been incorporated in Maryland with a capital of \$60,000. It has interests in six countries. Last year the United States produced more than 107,000,000 pounds of rayon alone, or about twice as much as its nearest competitor, Italy.

The first balloon made its ascent in France in 1783; the year England recognized the independence of America.

Don't dose
a Child's
Cold

CONTINUAL dosing upsets children's delicate stomachs. Vicks is applied externally and therefore cannot disturb the digestion. It acts in two ways:

(1) The body heat releases the ingredients in the form of vapors which are inhaled.

(2) At the same time Vicks "draws out" the soreness like a poultice.

2 ways at once
VICKS
VAPORUB
OVER 14 MILLION JARS USED YEARLY

Little Helps For This Week

"Teach me to do Thy will, for Thy art my God; Thy Spirit is good; lead me into the land of uprightness."—Psalm cxli, 10.

Though one but say
"Thy will be done,"
He hath not lost his day
At set of sun.
—Christine G. Rossetti.

It is not always easy to discern the will of God; but if the fountain of our life is kept pure, the water of life must flow from it and our day's work contribute to the great stream of life that flows out from the city of God for the healing of the nations; and in this stream all our own little trials get turned into gold.—Harriet Monseil

A Lonely Family

That they have the loneliest home circle in Australia, possibly in the world, is the claim of the family of Mr. Gunna, telegraph operator at the Cape York station, in the farthest north point in Australia. On one side are hundreds of miles of impenetrable bush and on the other leagues of shark-infested sea. In the last three years the Gunna have seen only 20 people.

A Lutheran service in English will be held in Stony Plain Sunday next at 7:30 p.m., by Rev. V. A. Osterman. Service at United church Sunday evening at 7:30; Rev. G. A. Sauder.

Tractors for Snow Removal.

Snow removal from Alberta's main highways is to be undertaken this winter by the Provincial Public Works Dept. A number of the most heavily traveled sections in different parts of the province will be covered by snowplows operated by tractors. The work will be done this season by way of experiment. Minister of Public Works Macpherson says that the purpose will be to ascertain what measure of relief snow removal will afford and how much winter traffic on the main highways will develop as a result. It will be the first time that the Government has attempted a snow-removal program, but previous winters have shown the necessity of action in this line, and it is expected that if the usual snowfall materialises the tractors will fill a long-felt want.

Spruce Grove News

The comedy "The Deacon Slips," given Friday night in the United church was a huge success, the building being well filled when the curtain went up. All taking part acquitted themselves creditably.

Mr. Vincent O'Donnell, the mining engineer, is at present in University hospital, receiving treatment for an injury he sustained at a Clover Bar mine a short time ago.

The group which presented the comedy "The Deacon Slips" at the Grove, recently will give presentations at outside points, including Holborn.

The turkey shoot held on Tuesday at the McVerstijne farm, north of the Grove, did not draw a big crowd, due to the extreme cold.

When interviewed recently regarding adopting a vegetable diet, Butcher McKeen replied that the most enjoyable way to follow a vegetable diet was to let the steer eat it first and take yours in the form of steak, if you like!

Holborn Happenings.

Hugh McKinnon purchased a Pontiac car from the local agent, Mr. Pidgeon.

Mr. Reuben Larson has been nominated, as delegate to the Dairy Pool convention, to be held in Edmonton next month.

Holborn U.F.A. met Saturday night, the election of officers for the coming year being the chief feature. The following were elected:

Pres., Reuben Larson; V. Pres., T. R. Scott, Melker Larson, A. J. Anderson.

The U.F. local is putting on a dance here in the Hall, tomorrow night, with Martin's Orchestra of Edmonton providing the music.

A big attendance is expected at the meeting in the local hall next Saturday evening of the Wheat pool local. A member of the Field Service Branch will be present, and Delegate Powell is expected to make a report on the proceedings at the Pool convention held recently in Calgary.

Golden Spike

The funeral took place on Thursday last of August Ludwig (infant son of Mr and Mrs Aug. Gehlert of Golden Spike) who had passed away on the 4th. A service was held at the home, and interment took place in Golden Spike cemetery.

Extremes in ocean travel were experienced recently by Baron van Hardenbroek van Loockhorst, Dutch nobleman who was in Canada purchasing black boxes for his ranch in Holland. He came to Canada on S.S. Empress of France one of the most luxurious ships on the St. Lawrence route, but travelled back on Canadian Pacific freighter Beaverhill with the 14 pairs of valuable animals he had purchased in Prince Edward Island.

A romance of mining has been disclosed in Nova Scotia where a long abandoned mine was investigated and found to contain one of the richest gold lodes ever discovered in the province. The mine had been worked with crude methods many years ago and then given up. New claims have now been filed and prospects are very encouraging. There are said to be many abandoned mines of rich possibilities in the province.

Carrying 225 passengers and a total of almost two million Japanese oranges, the cargo of the fruit to reach Canada this year, Canadian Pacific liner Empress of Asia, docked at Vancouver recently after a record trip from the Orient. The vessel had aboard a number of Canadian delegates to the Pacific Relations Conference held at Kyoto, Japan.

Direct contradiction of the opinion of Col. Frederick Palmer, American war correspondent, that it would be well for Christian churches to withdraw their missionaries from the Orient, has been voiced by Bishop W. H. Alabworth, Macdon, Ga., who was a passenger recently on the S.S. Empress of Asia. "Christian missions to China and Japan were never doing better than at present," said the bishop who is in charge of Eastern Missions for the Methodist Episcopal Church of the Southern United States.

The province of Nova Scotia is on the threshold of a period of unprecedented development judging from the record business being handled during the current year by the Dominion Atlantic Railway, and the scope of the preparations now under way for the development of tourist traffic," says George E. Graham, vice-president and general manager of the railway, in a recent interview.

Total amount of life insurance carried by the people of Canada is at present about \$6,500,000,000 or approximately \$500 for every man, woman and child in the Dominion. The United States with \$750 per head of population is the only country in the world that exceeds Canada in the amount of life insurance carried.

The 1949 total yield of potatoes in Canada is estimated at 74,445,000 bushels from 445,250 acres, valued at \$67,651,099 compared with 83,165,000 bushels in 1928 from 550,064 acres, valued at \$40,874,000. Quebec province produced the most with 28,250,000 bushels.

Canada's Royal Agricultural Fair, begun off the pace on the American continent in November, is the eighth annual occasion and is being held at Toronto with over 10,000 exhibitors and 100,000 visitors.
